The double profit: Trading gains+Token appreciation

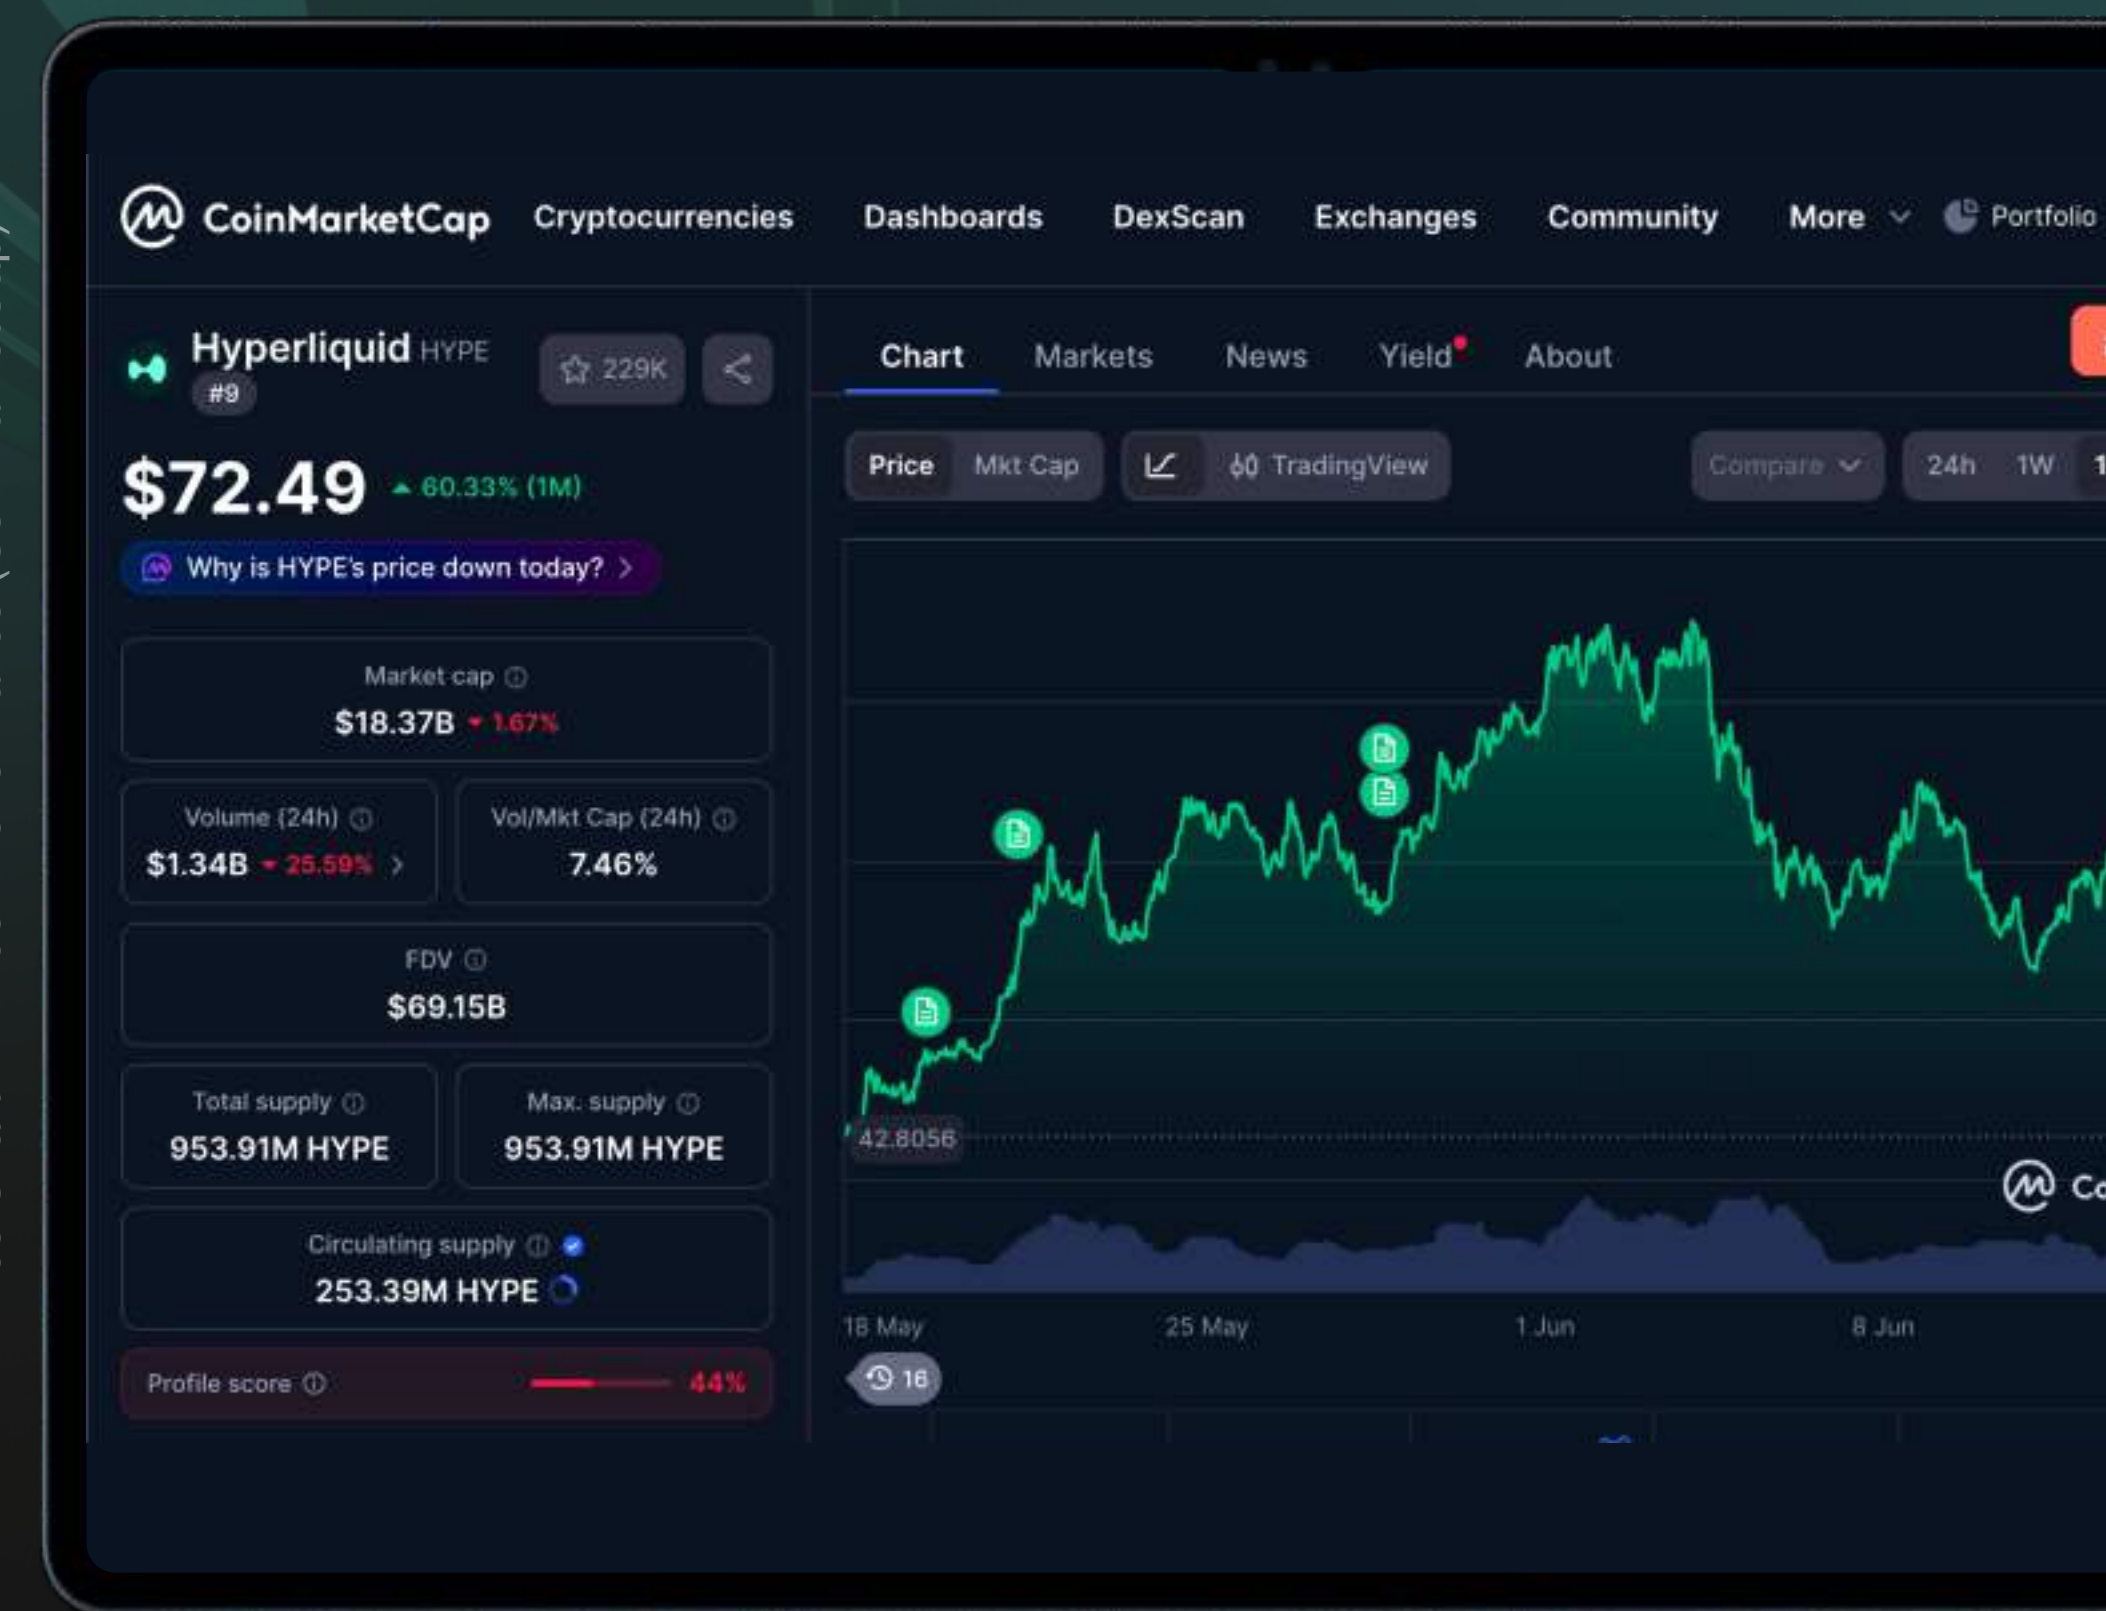

You don't just earn from trading — you accumulate HYPE while it rises in value.

YOUR EFFECTIVE DAILY YIELD - 3 SCENARIOS:

HYPE Price Chart - 4-Week Performance (CoinMarketCap)

You decide: secure profits daily — or accumulate and multiply. The choice is yours.

*Disclaimer: Figures are for illustration only and do not guarantee future earnings. Crypto investments carry high risk of loss.

Effective return: the real calculation

What you actually earn depends on one decision — what you do with your HYPE.

01

Sell immediately

~0.5%

per day

You receive HYPE daily and sell it immediately for USDT. Stable, predictable, conservative. You capture only the trading profit - no exposure to token price movement.

\$10,000 deposit → \$50/DAY → \$1,500/month

02

Accumulate HYPE

~0.75%

per day

You hold your HYPE instead of selling. As the token appreciates even moderately, your effective yield increases. Compound effect kicks in - your HYPE stack grows in both quantity and value.

\$10,000 deposit → **\$75/DAY EFFECTIVE** → \$2,250/month

03

Accumulate+price rise

1–2%+

per day

You accumulate HYPE while the token price rises. This is exactly what happened in the first 4 weeks after launch: +55% price gain = +1.96%/day from price alone. Combined with trading profits: up to 2.46%/day.

\$10,000 deposit → **\$150–\$200+/DAY** → \$4,500–\$6,000/month

Infinity bonus - daily differential bonus to infinite depth

Reach a career rank and earn the differential between your rank and your downline's rank — on your entire network, forever.

HOW THE DIFFERENTIAL BONUS WORKS:

EXAMPLE:

You are Platinum (20%). Your three direct legs have different ranks

Leg A/Differential

10%

Silver (10%)

Leg B/Differential

20%

Starter (0%)

Leg C/Differential

1%

Platinum (20%)

Even if a direct partner reaches your same rank, you still earn 1% minimum on their entire downline — to infinite depth.

Combined total always equals 1% of your team volume — distributed as differentials across all ranks in your structure. The higher your rank, the larger your share of that 1%.
